In the Matter of	)	
	)	
Advanced Television Systems	)	MB Docket No. 87-268
And Their Impact Upon The Existing	)	
Television Broadcast Service	)	

To: The Secretary

**COMMENTS OF WAITT BROADCASTING, INC.**

Waitt Broadcasting, Inc. ("Waitt"), licensee of television Station KMEG (Fac. ID 39665), Sioux City, Iowa, by its attorney, hereby tenders its Comments in the captioned proceeding in response to the Commission's *Seventh Further Notice of Proposed Rule Making* ("7<sup>th</sup> FNPRM"), FCC 06-150, released October 20, 2006, 71 Fed. Reg. 66592 (published November 15, 2006).<sup>1</sup> Waitt proposes the minor coordinate change specified below to Appendix B to the 7<sup>th</sup> FNPRM.

Waitt holds a construction permit authorizing it to build and operate digital commercial television broadcast station KMEG-DT on Channel 39 at Sioux City.<sup>2</sup> These Comments are submitted in accordance with paragraph 16 of the 7<sup>th</sup> FNPRM,

---

<sup>1</sup> By *Order Granting Extension of Time for Filing Comments and Reply Comments*, DA 07-38, released January 9, 2007, the Chief, Media Bureau, extended the comment period in this proceeding to January 25, 2007. Thus, these Comments are timely filed.

<sup>2</sup> See File No. BPCDT-19990415KE, granted January 16, 2001, as subsequently extended.

which invites responses to the Commission's proposed new Table of Channel Allotments for Digital Television ("DTV") Broadcasting Stations, in order to rectify inaccuracies contained in Appendix B to the 7<sup>th</sup> FNPRM.

Waitt proposes the following revision to the Appendix B DTV database: the longitudinal coordinates for KMEG-DT's allotment should be listed as 961318, rather than 961319 as currently shown in Appendix B. Although the Appendix coordinates conform to those in the station's DTV construction permit, footnote 2, *supra*, Waitt believes that the CP is inaccurate by one second of longitude. The antenna structure registration ("ASR") for the tower upon which KMEG-DT's antenna is mounted<sup>3</sup> specifies the correct longitudinal coordinates: 96° 13' 18" West Longitude. In its forthcoming covering license application, Waitt will ask that Commission records be revised accordingly.<sup>4 5</sup>

---

<sup>3</sup> ASR No. 1057963.

<sup>4</sup> A simple correction of geographic coordinates for a television station amounting to one second of longitude may be accomplished in the filing of a license application. 47 C.F.R. § 73.1690(c)(11).

<sup>5</sup> In addition, there is a seven-foot discrepancy between the structure's authorized height and its actual height as constructed. Commission staff have advised Waitt to file its license application based upon the actual height. Waitt will promptly apprise the Commission of pertinent information received from the Federal Aviation Administration in connection with this matter.

WHEREFORE, for these reasons, Waitt requests that the Commission modify  
Appendix B as set forth above.

Respectfully submitted,

**WAITT BROADCASTING, INC.**
